EDUCATION

York University

Toronto, Ontario

Bachelor of Science, Computer Science (Honours)

Expected April 2028

- Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Computer Organization, Theory of Computation, Computing in Java, Discrete Mathematics, Statistics
- Awarded: 1st Place and Best use of Gemini - CSHub Hackathon (\$400), Scholarship (\$2000)

EXPERIENCE

Software Engineer Intern (Mobile)

Feb 2026 to Present

LangPal

Seattle, Washington (Remote)

- Developing a language learning mobile application using **Flutter** and **FastAPI** that helps over **500 users** practice new languages through interactive prompts and real-world conversation scenarios.
- Creating modular UI components and implementing **BLoC state management** to reduce unnecessary screen refreshes by **30%**, maintaining a smooth **60 FPS** experience for both iOS and Android users.
- Optimized **PostgreSQL** database response times by **150ms** through strategic indexing and improved table structures, ensuring language content loads instantly for users globally.

Software Engineer

Feb 2026 to Present

Happy Nutrition / Natural Health Academy

Toronto, Ontario (Remote)

- Architecting an **AI-driven content pipeline** using **LLMs** and **LangChain** to automate the creation of interactive educational modules, reducing manual development time by **30%**.
- Optimizing a **Natural Health AI Agent** by implementing **RAG (Retrieval-Augmented Generation)** and vector databases, increasing the accuracy of personalized nutritional solutions by **25%**.
- Developing **interactive UI components** to deliver AI-generated health content, improving student engagement metrics by **15%** while ensuring 100% alignment with the Academy's curriculum.

Software Developer

Jan 2026 to Present

YU Blueprint

Toronto, Ontario

- Building a **Gift Card Management Dashboard** with **Next.js** and **Prisma** to track **\$10,000+** in donations, moving the organization from 15+ manual spreadsheets to a single database system.
- Adding live charts with **Recharts** and secure login features so 20+ volunteers can safely see how many gift cards are available and where they are being distributed in the community.
- Working directly with product managers and designers to turn project goals into working features while keeping the code reliable and bug-free through consistent **automated unit testing**.

PROJECTS

LifeByDorm | *TypeScript, React, Express.js, Node.js, MongoDB, Docker, AWS S3, Lambda* Oct 2025 to Present

- Architecting a scalable **B2C full stack web platform**, serving content for **30+ universities** and reviews for **200+ dormitories**, designing a flexible **MongoDB schema** to query all housing data.
- Developing **250+** secure REST API endpoints and integrated **AWS S3** for **scalable object storage**, enabling **efficient handling** and **secure management** of user-uploaded media.
- Ensuring **full system reliability** by engineering a strict **quality assurance workflow** using **Docker** and executing **integration tests** through **CI/CD pipelines**.

TenantShield | *1st Place* | *React.js, Express.js, Node.js, Gemini API, Vercel*

Nov 2025

- Automated detection of unsafe conditions by processing user-uploaded images with **Gemini Vision AI**, identifying **20+ common hazards** with **95%+ accuracy** through fine-tuned computer vision logic.
- Streamlined housing rights analysis using **AI** to cross-reference violations with legal codes, reducing tenant research time **from hours to under 30 seconds** through personalized action plans.
- Integrated **Google Maps API**, connecting **100% of users** with localized legal clinics and housing authorities through a **location-based service**.

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Python, C, HTML5, CSS3, Assembly RISC-V

Frameworks & Libraries: React.js, React Native, Node.js, Next.js, Express.js, JUnit, Vitest, Supertest, Tailwind CSS

Developer Tools: MongoDB (NoSQL), Firebase, Docker, Stripe, Git, Vercel, AWS S3, Lambda, REST API, CI/CD
