EDUCATION

York University, Lassonde School of Engineering

Toronto, Ontario

Bachelor of Science, Computer Science (Honours)

Expected May 2028

- Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Computer Organization, Theory of Computation, Computing in Java, Discrete Mathematics, Statistics
- Awarded: 1st Place & Best use of Gemini - CSHub Hackathon, Scholarship (\$2000)

PROJECTS

LifeByDorm | *TypeScript, React, Express.js, Node.js, MongoDB, Docker, AWS S3, Lambda* Oct 2025 - Present

- Architecting a scalable **B2C full stack web platform** to serve content for **30+ universities** and reviews for **200+ dormitories**, designing a flexible **MongoDB schema** to efficiently organize and query all housing data
- Developed **250+ secure REST API endpoints** and integrated **AWS S3** for **scalable object storage**, enabling **efficient handling** and **secure management** of user-uploaded media and dormitory reviews
- Maintained **full system reliability** by engineering a strict **quality assurance workflow** using **Docker**, enforcing **TypeScript** type safety validation and executing **integration tests** through **CI/CD pipelines**

TenantShield | *1st Place* | *React.js, Express.js, Node.js, Gemini API, Vercel* Nov 2025

- Automated the detection of unsafe conditions by processing user-uploaded images with **Gemini Vision AI API**, identifying **20+ common hazards** with **95%+ accuracy** through a **fine-tuned computer vision model**
- Streamlined housing rights analysis using **AI** to cross-reference violations with legal codes, reducing tenant research time **from hours to under 30 seconds** through **personalized action plans**
- Increased user access to **critical legal resources** by integrating **Google Maps API**, connecting **100% of users** with localized legal clinics and housing authorities through a **location-based service**

OutTheGroupChat | *React.js, Express.js, Node.js, Firebase, CSS3, Gemini API, ElevenLabs API* Oct 2025

- Integrated **Gemini AI API** to function as the **core itinerary engine**, automatically generating **day-by-day plans** structured from user-defined fields reducing **manual planning effort** by an estimated **75%**
- Designed a **cloud-based backend infrastructure** using **Firebase Firestore** to **automate the workflow** from raw user input to a structured, **AI-generated itinerary** for **10+ users**
- Engineered and maintained **client-side API integration logic** using **React**, creating a **seamless data flow** between the front end and the cloud database for travel plans, improving **data synchronization**

E-Commerce Platform | *React.js, Express.js, Node.js, Firebase, CSS3, Stripe* Aug 2025 - Oct 2025

- Created and populated a **Firestore database schema** for products and user orders, enabling **efficient data retrieval** and **scalable management** of the application's inventory
- Integrated the **Stripe API** via a custom **Express.js and Node.js server** to process payments securely, achieving a **15%** reduction in checkout latency by caching frequent product queries in Firebase

EXPERIENCE

Head Waiter

July 2020 – Aug 2024

Black and White Chinese Restaurant

Fergus, Ontario

- Led and trained **3 new staff members** within an **8-person team** to manage high-volume shifts, consistently resolving **95%+ of customer issues**, directly contributing to enhanced customer satisfaction
- Supported junior staff and maintained smooth shift operations through clear guidance and communication

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, Python, C, HTML5, CSS3, Assembly RISC-V

Frameworks & Libraries: React.js, React Native, Node.js, Next.js, Express.js, JUnit, Vitest, Supertest, Tailwind CSS

Developer Tools: MongoDB (NoSQL), Firebase, Docker, Stripe, Git, Vercel, AWS S3, Lambda
