EDUCATION

York University

Bachelor of Science, Computer Science (Honours)

Toronto, Ontario

Expected April 2028

- Relevant Coursework: Object-Oriented Programming, Data Structures and Algorithms, Computer Organization
- Awarded: 1st Place and Best use of Gemini - CSHub Hackathon (\$400), Scholarship (\$2000)

EXPERIENCE

Software Engineer Intern

LangPal

Feb 2026 – Present

Seattle, Washington (Remote)

- Developing a language learning mobile app using **Flutter** and **FastAPI** serving a user base of **2000+** users practice new languages through interactive prompts and real speech-to-speech conversation scenarios.
- Creating modular UI components and implementing **BLoC state management** to reduce unnecessary screen refreshes by **30%**, maintaining a smooth **60 FPS** experience for both iOS and Android users.
- Optimized **PostgreSQL** database response times by **150ms** through strategic indexing and improved table structures, ensuring language content loads instantly for users globally.

AI & Software Engineer (Project-Based)

Happy Nutrition Academy

Feb 2026 – April 2026

Toronto, Ontario

- Developing an **AI-driven content pipeline** using **LLMs** and **LangChain** to automate educational module creation, reducing manual development time by **30%**.
- Optimized a **Natural Health AI Agent** and **Chatbot** via **RAG (Retrieval-Augmented Generation)** and vector databases, increasing accuracy of personalized solutions by **25%**.

PROJECTS

LifeByDorm | [GitHub](#) | *TypeScript, React, Express.js, Node.js, MongoDB, Docker, AWS*

Oct 2025 – Present

- Architecting a scalable **B2C full stack web platform**, serving content for **30+ universities** and reviews for **200+ dormitories**, designing a flexible **MongoDB schema** to query all housing data.
- Built **250+** secure **REST API** endpoints leveraging **AWS Lambda** for scalable serverless execution and **S3** for object storage, while implementing **IAM policies** to ensure secure management of user-uploaded media
- Ensuring **full system reliability** by engineering a strict **quality assurance workflow** using **Docker** and executing **integration tests** through **CI/CD pipelines** and **Vitest**.

TenantShield | *1st Place Winner* | [GitHub](#) | *React.js, Express.js, Node.js, Gemini API, Vercel*

Nov 2025

- Automated detection of unsafe conditions by processing user-uploaded images with **Gemini Vision AI**, identifying **20+ common housing hazards** with **95%+ accuracy** through optimized vision-to-text logic.
- Streamlined housing rights analysis using **AI** to cross-reference violations with legal codes, reducing tenant research time **from hours to under 30 seconds** through personalized action plans.
- Integrated **Google Maps API**, connecting **100% of users** with localized legal clinics through a **location-based service**; automated the generation of landlord dispute emails to streamline tenant advocacy.

INVOLVEMENT

Software Developer

YU Blueprint

Jan 2026 – Present

Toronto, Ontario

- Building a **Gift Card Management Dashboard** for a non-profit organization with **Next.js** and **Prisma** to track **\$10,000+** in donations, migrating from 15 manual spreadsheets to a central automated database.
- Working directly with product managers and designers to turn project goals into working features while keeping the code reliable and bug-free through consistent **automated unit testing** using **Vitest**

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, C, HTML/CSS, Assembly RISC-V

Frameworks: React, React Native, Node.js, Next.js, Express.js, Flutter, FastAPI, Tailwind CSS

Tools/Cloud: MongoDB (NoSQL), PostgreSQL, Firebase, Docker, AWS (S3, Lambda), Git, CI/CD, REST APIs
